EDUCATION

University of Toronto

September 2022 - January 2028

Bachelor of Science in Computer Science, Minor in Mathematics and Statistics

Toronto, Ontario

Relevant Coursework: Systems Programming, Data Structures & Analysis, Computer Organization, Software Engineering, Probability, Statistics and Data Analysis

EXPERIENCE

TD Bank Group

September 2026 – Present

Software Engineer Intern

Toronto, Canada

- Contributing to the development and maintenance of enterprise software systems at TD Bank Group, collaborating with engineering teams to deliver reliable solutions in a **large-scale** production environment.

Mireta Urban Dynamics

January 2026 – April 2026

Software Engineer Co-op

Toronto, Canada

- Engineered the entire backend for a traffic simulation system, implementing high-performance simulation algorithms in **Python (FastAPI)** to process large-scale GeoJSON data and model traffic scenarios with **~95%** accuracy.
- Improved upload speeds by **~40%**, reduced **AWS costs** by **~25%**, and achieved **~99.5% reliability** by engineering a **direct-to-S3** upload system using pre-signed URLs, bypassing multi-layer proxy bottlenecks.
- Deployed scalable backend on **EC2** with containerized **Docker** environments integrated into GitHub Actions **CI/CD** pipelines, reducing deployment time by **60%** and ensuring reliable updates across multiple development cycles.

SM Software Solutions Inc.

July 2025 – September 2025

Software Engineer Intern

Toronto, Canada

- Handled **100+ requests/sec**, reducing API latency to **~200ms** by designing and optimizing a MERN full-stack job platform serving **40K+ users** across **80+ clients**.
- Integrated a scalable **WebSocket**-based AI-powered real-time support chat system, reducing customer query response times by 40%, with **sub-100ms** messaging latency, improving overall customer satisfaction scores.
- Built a dynamic admin dashboard capable of managing live chat requests, job postings, and regional configurations, leading to a **20%** increase in administrative efficiency; deployed on **AWS EC2** and **RDS** for high availability.

PROJECTS

Recurr | React Native, TypeScript, ExpressJS, Redis

- Engineered an **Express.js (TypeScript)** backend leveraging **Redis + BullMQ** for distributed job queues, enabling asynchronous subscription detection pipelines with reliable performance under high concurrency.
- Developed a cross-platform **React Native (Expo)** application with secure authentication and real-time subscription tracking, integrating third-party APIs to provide actionable insights into recurring expenses.

MovieMate | React, Spring Boot, PostgreSQL, Scikit-Learn

- Developed a movie recommendation platform leveraging a cosine similarity-based model using **Python (scikit-learn)** to deliver personalized content discovery.
- Architected a production-grade **Spring Boot + PostgreSQL** backend with **JWT** authentication and modular **REST APIs** for scalable user and recommendation workflows.

LEADERSHIP EXPERIENCE

Chief Technology Officer (CTO)

February 2026 – Present

SimpleTab

Toronto, Canada

- Leading end-to-end development of a **full-stack SaaS platform** for Canadian trades, architecting a **Supabase** backend and scalable PWA that streamlines quoting, invoicing, and CRM workflows for small businesses.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL, Bash, R, HTML, CSS

Frameworks & Libraries: React, TailwindCSS, Next.js, Express.js, Node.js, Nest.js, FastAPI, Scikit Learn, Spring Boot

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite

Cloud & Infrastructure: AWS (Lambda, EC2, S3, ECR), Vercel, Cloudflare, Railway, Supabase

DevOps & Tools: GitHub Actions (CI/CD), Docker, Kubernetes, Nginx, Linux/Unix
